

Tetto5G™

ENABLING A MORE CONNECTED, MOBILE AND SECURE SOCIETY™

COMPTEK

In business since 1998, Comptek has deployed thousands of CityPoles™ from Los Angeles to New York and many places in between. Comptek is a trusted vendor to Verizon Wireless, Crown Castle, AT&T, T-Mobile, Cox Communications, Xcel Energy, and numerous municipalities. Collectively, Comptek has been awarded over 20 patents for its technological innovations.

Comptek's expertise:

- Delivering cost effective and innovative 5G small cell infrastructure with a modern aesthetic.
- Offers a full suite of concealment poles, shrouds, and infrastructure solutions.
- Offers patented CityPoles™ that wireless carriers and municipalities have widely embraced.
- Comptek's small cell solutions provide:
 - Flexible and accommodate future equipment changes, IOT technologies, and co-location of multiple tenants
 - Secure equipment cabinets and service access doors
 - Separate Wireless and Utility
 - All necessary technology housed within single SmartPole™

A novel approach to meeting the challenge of deploying critical technology empowered infrastructure.

- We facilitate the relationship between property owners and service providers through a planned network of thousands of Smart Hubs containing complementary technologies, including 5G cell sites, EV charging stations, security technology, and digital advertising services, co-located on a single structure.
- Enables a more connected, mobile, and secure society by creating "Bubbles of Connectivity"™ where people live, work, shop, play, invest, worship and stay.
- Generates incremental revenue opportunities and drives more traffic for site hosts.
- Provides carriers an alternative solution for the deployment of small cells needed for true 5G.
- With enhanced connectivity, our Site Hosts become sought after destinations.
- Opens new IT capabilities for Site Hosts.
- Enables wireless carriers and energy companies to build out more quickly while minimizing disruption to the site host's business.
- Furthers broadband equity and digital literacy in underserved communities

LEVERAGE
Your Advantage

www.myleverage.com

2 COMPANIES COME TOGETHER TO OFFER A **TURNKEY SOLUTION** FOR PROPERTY OWNERS AND WIRELESS CARRIERS ALIKE

PROPERTY OWNERS

- Captures incremental annuity-like revenues from high-quality counterparties and drives an increase in retail sales to offset expense challenges
- Risk-free way to potentially increase property value
- Improved connectivity helps attract a broad customer base, increase dwell time, and build loyalty
- Puts businesses on the map as a “destination” with branded and differentiated in-demand services
- Enhances corporate image as a local leader in sustainability, innovation and quality of service

PRODUCT FEATURES

CONNEXION CENTRAL™ & COMPTTEK

Together Connexion Central and Comptek Technologies provide wireless carriers, property owners, energy companies, advertisers, communities, and associations with a turnkey solution for infrastructure.

Our planned network of thousands of smart hubs will reach across the United States, helping drive broad economic growth, in many cases, to underserved communities.

5G SMARTPOLE WITH ELECTRIC VEHICLE (EV) CHARGER

5G Service: The 5G SmartPoles™ will be located in your business parking lot extending 5G service to your customers, staff and community.

EV Charging: The SmartPoles™ will provide two EV charging stations for customers, staff and community.

Additional Chargers: Additional base units can be added to accommodate more charging stations for customers, staff & community.

Customized Options: The SmartPoles™ itself can be customized to match your business branding.

Digital Signage*: The SmartPoles™, as an option, offers a digital sign that can be customized to promote your business products or services.

Security*: Additional security for the business can be added to the Smartpole.

Note: Traditional installation options of 5G products are available. Installation options include the rooftop or side of your building.

*Note: to access specific services, site hosts must become customers of our service providers.

WIRELESS CARRIERS

- Helps meet build-out goals by providing access to tens of thousands of quality locations for the deployment of super fast 5G and EV chargers
- The Connexion Central™ turnkey approach:
 - Providing committed site owners
 - Reducing operating burden
 - Speeds deployment by handling pre-work of fiber, power and zoning
 - Lowers capital costs
- Furthers broadband equity by delivering the fastest 5G speeds to more subscribers across more of the US
